Hi there,

In July, NCARB migrated the delivery of the Architect Registration Examination® (ARE®) to our new test delivery vendor, PSI. As part of the migration, we also enhanced the ARE 5.0 score reports to provide you with clearer feedback on failed division performance—including on divisions you've previously attempted with Prometric.

Learn More

Key Updates

The enhanced score reports include two key changes.

- First, **you'll see percentage-based performance information for each divisional content area on failing score reports**, comparing the percent of items you answered correctly to the average percent answered correctly by candidates who previously passed the division. This percentage-based information replaces the previous level-based feedback.
- Second, **failing score reports for divisions taken with PSI will include a scaled score**, which provides a consistent metric for interpreting scores across administrations. Scaled scores will not be provided on passing score reports or for exams previously taken with Prometric—that area of your score report will be blank.
